

Quentin Adolphe

Detroit, MI | gadolphe1@gmail.com | <https://qadolphe.com>

Education:

Swarthmore College, Swarthmore, PA

Class of 2025

Major & Minor: Computer Science and Engineering

GPA: 3.9/4.0

Work Experience:

General Motors

2024 - Present

Dimensional Systems Engineer | 2026 - Present

- Replaced a manual Excel/VBA workflow with a Databricks ETL pipeline, processing ~100K deliverable rows across vehicle programs to improve DSE visibility and execution

CFD Automation Engineer | 2025 - 2026

- Engineered a Python analytics framework to evaluate how tire parameters affect virtual vehicle stability
- Modernized legacy Tkinter GUI to a React/Electron and Flask monorepo to streamline pre-processing, submission, monitoring, and post-processing work
- Orchestrated HPC interactions via Flask REST APIs; delivered dashboards and NumPy/Pillow post-processing

Software Validation Engineer Intern | Summer 2024

- Built applications assisting in flash development, including a custom utility file generator tool
- Automated ECU flash validation against Software-Defined Vehicle specifications

United Services Automobile Association (USAA) - Software Engineering Intern

Summer 2023

- Full-stack development of a modernized life insurance application
- Implemented pages with React.js and JavaScript, and created metadata

Forward Edge AI - Economic Research Investigator

Summer 2022

- Wrote a National Science Foundation-funded economics research paper on the business dealings and intricacies of scam centers and criminals around the world
- Assessed cybersecurity and operational capabilities for the NSA's Protocol Free Encryption Device as part of a CRADA team

Projects: <https://qadolphe.com>

Running Analysis with Machine Learning – Kotlin, TensorFlow

- Used TensorFlow's Thunder convolutional neural network to estimate the position of a sprinter's joints
- Trained neural network to identify the current phase of a sprinter in motion

3D Triangulation of Objects – Python

- Calibrated a stereo camera setup to calculate 3D real-world coordinates from 2D images

Heart Rate Monitor – TypeScript, Next.js

- Designed and built a monitor using an ECG measurement system and Nucleo board

Hobbies and Skills:

- **Skills:** Data aggregation, Process automation, ETL pipelines, Python, Java, React, Node.js, MCP Servers
- **Sports:** Varsity Track and Field (Swarthmore College), Soccer, Ultimate Frisbee
